

PROFILE

Highly skilled and motivated Full-Stack Software Engineer with over 7 years of experience in building and deploying full-stack web applications. Adept in designing and implementing scalable data services and APIs, with extensive knowledge in Java, JavaScript, TypeScript, and React. Passionate about creating quality technology and ensuring security and performance. Seeking to contribute to a fast-paced, agile team to enhance software solutions.

PROFESSIONAL EXPERIENCE

PK Fokam Research Center

Yaounde – Cameroon

Java developer

Since January 2024

- Develop and maintain Java web applications with Spring Boot, JPA, Hibernate and Axon.
- Implement business processes with Camunda.
- Secure REST APIs with Keycloak.

Tech11 Gmbh

full remote

Jakarta EE developer

July 2022 – December 2023

- Develop and maintain Jakarta EE applications with Microprofile, JAX-RS, JPA, Hibernate and Quarkus.
- Maintain and implement business processes with Camunda.
- Secure REST APIs with Keycloak.
- Develop and deploy applications with Docker and WildFly.
- Developed and maintained comprehensive test coverage using Cypress, REST-assured, and Postman.

Connect Technology

Yaounde – Cameroon

Fullstack Java developer

April 2022 – June 2022

- Corrective and evolutionary maintenance of e-commerce platforms using Next.js and Material UI.
- Development of RESTful endpoints using Spring Boot and Kotlin.

World Voice Group

Yaounde – Cameroon

Fullstack Java developer

January 2020 – April 2022

- Led the development of full-stack web applications for financial institutions using Java, JavaScript, TypeScript, and React.
- Collaborated closely with product and design teams to deliver high-quality user experiences.

- Designed and implemented scalable data services and APIs, ensuring robust performance and security.
- Administration of CentOS 7 servers for debugging or deploying applications on production Tomcat and PM2 environments.
- Contributed to the technical design process, providing expertise and analysis for data-driven decision-making.
- Maintenance of different applications in production.
- Use AWS Neptune and DynamoDB as NoSQL databases to store data.
- Implemented CI/CD pipelines using GitHub Actions to streamline the deployment process.

KTC-Center

Yaounde – Cameroon

Python developer

September 2019 – December 2019

- Design and implementation of an e-commerce web application with Django and Python.
- Configuring Nginx for deploying applications on virtual private servers.
- Getting started with the Wordpress CMS for the development of websites.
- Administration and maintenance of websites.

Camertronix

Yaounde – Cameroon

Java developer

October 2017 – February 2019

- Front-end development of microservices-based applications with Spring Boot and the Thymeleaf template engine.
- Introduction to native development on iOS and Android using Objective-C and Java languages respectively.
- Implementation of user-friendly web interfaces using design thinking principles.
- Collaboration with team members using GIT.

Seinova

Yaounde – Cameroon

Junior web developer

April 2016 – March 2017

- Introduction to SCRUM methodology and participation in brainstorming sessions and daily meetings.
- Used Yii2 framework to deliver many modules in our applications.
- Collaboration with team members via SVN Tortoise for code tracking.
- Design and implementation of web interfaces using HTML, CSS, JavaScript, Bootstrap and JQuery.
- Adhered to web application security practices, including XSS, CORS, CSRF protection, Clickjacking protection, and SQL Injection.
- Supported end-to-end feature releases and platform enhancements, fostering a culture of testing and quality.

EDUCATION

Bachelor in mathematics and computer science

June 2015

University of Douala, Cameroon

SKILLS

- **Programming languages:** Java, JavaScript, TypeScript
- **Frontend development:** HTML5, CSS3, ReactJS, JQuery, Bootstrap
- **Backend development:** REST APIs, scalable services
- **Testing:** Cypress, REST-assured, Postman
- **CI/CD:** GitHub Actions
- **Web Security:** XSS, CORS, CSRF protection, Clickjacking protection, SQL Injection
- **Cloud Technologies:** AWS Neptune and S3
- **Version Control:** Git, SVN Tortoise

LANGUAGE

French Advanced

English Intermediate
